

I, repectfully urge you to REJECT NAB's petition 04-160. The reason I invested in XM Radio is I was tired of hearing the same old songs and the news that the local radio stations wanted me to hear; not what I wanted to hear. XM radio provides me the oppurtunity to pick from a very large and diverse selection of music, news and talk show hosts. Also as a driver who spends a considerable amount of time on the road travelling from city to city I always use the new traffic and weather channels when entering the large cities, thus avoiding sitting in most traffic jams. When the local stations broadcast the traffic reports nine times out of ten the reports were previously recorded and stuck in during commercials therefore they are not accurate. Thank You for allowing me to put in my two cents.
